

# Ped Ramp Program

## About the Program:

The New York City Department of Transportation has initiated a program to survey pedestrian ramps located throughout the city at corners, as well as mid-block crossings and pedestrian islands. The Pedestrian Ramp Program will enhance NYC DOT's current pedestrian ramp maintenance programs by prioritizing and planning for the completion of all pedestrian ramp installations and upgrades pursuant to the Americans with Disabilities Act.

## What is a pedestrian ramp?

A pedestrian ramp, or ped ramp, connects the sidewalk to meet the roadbed at an even level to provide easy access to all pedestrians.

## Why are we working on pedestrian ramps?

Pedestrian ramps are a critical component in providing for safe and accessible means of travel throughout NYC. Pedestrian ramps provide access on and off city streets and sidewalks and are an essential tool for all pedestrians, especially aging New Yorkers and persons with disabilities.
